Monitoring and control through a web browser

Web Server

Web Broser(s)

Smart Phone

Internet

RemoteView

Remote monitoring and control over the internet, editing playlist and remote database search

Modem & Router

RemoteView

Monitoring of 25 channels at once within the MCR or over the internet. It will be difficult to watch 25 different playlists/screens. With this application operator needs to monitor only one screen and will see all the channels

TCP/IP to com port converter

Control DeviceMaster 32 Port

Network Hub

StorageManager

Automated File Transfer

AirMaster(s)

On-Air Playout

Two AirMasters can run on the same PC (separate monitors recommended) For 10 playout channels there would be five PCs and 10 monitors

AirMaster(s)

Mirror or N+1 Playout

Backup On-Air Playout Two AirMaster mirrors can work on one PC.

ClipMaker(s)

VTR/DVD Ingest

Automated ingest + timed recording Three ClipMakers can run on the same PC if necessary, so two PCs will be enough

EditMaster(s)

Playlist Scheduling

All EditMasters can run on single PC. Single EditMaster is also able to switch between different channels

WebSync

Web server synchronizer for OnLineMCR

Wire

Fiber or IEEE

Network

A/V

Device Control (RS422/RS232)
